ABOUT ME

Computer Science undergraduate at Sunway University and Lancaster University (CGPA 3.80), specialising in cybersecurity, full-stack development, AI/ML, and robotics. Recognised at Google KitaHack 2025 for building Punca-AI, an AI-powered math education platform targeting equal learning access for all students. Experienced across live penetration testing, IoT systems, multi-platform app development, and educating 100+ students in Robotics and programming.

EDUCATION

BSc (Hons) Computer Science

2025 - 2027

Sunway University and Lancaster University (Dual Award)

Current CGPA: 3.80 | Focus: AI, Cybersecurity, Software Engineering

Diploma in Information Technology

2023 - 2025

Sunway College Kuala Lumpur

CGPA: 3.82 | Graduated with Distinction

Sijil Pelajaran Malaysia (SPM)

2018 - 2023

SMK USJ 12

1A+, 1A, 1A-, 4B+, 1C+, 1E | House Captain and Class Monitor

WORK EXPERIENCE

Research Centre for Human-Machine Collaboration (HUMAC)

Aug 2025 - Present

Lab Apprentice, Advanced Robotics Team

- Perform 3D modelling and precision hardware assembly of electronic components for advanced robotic systems under faculty supervision.
- Contribute to the full design-develop-evaluate lifecycle of robotic solutions targeting real-world research and industry applications.
- Collaborate with researchers and engineers, applying embedded systems knowledge to advance active lab prototypes.

Robinuo Learning Hub

Aug 2025 - Present

Admin cum Coach

- Coach children in Robotics and Arduino programming, translating complex engineering concepts into engaging, hands-on lessons.
- Design structured lesson plans that measurably improve student confidence in STEM; manage event planning, scheduling, and parent communications.

LGMS Berhad

Aug 2024 - Jan 2025

Cybersecurity Intern

- Executed penetration tests on web and mobile applications using Burp Suite, identifying critical vulnerabilities prior to production deployment.
- Developed Python and VBA automation scripts for security scanning and reporting, significantly reducing manual overhead.
- Conducted on-site physical security assessments and authored detailed risk reports with prioritised remediation roadmaps for clients.
- Collaborated with senior analysts to deliver actionable security and compliance recommendations to stakeholders.

P3 Robotics

Oct 2023 - May 2025

Robotics Teacher

- Designed and delivered Scratch, Python, and sensor-integration curricula, fostering computational thinking in young learners.
- Prepared and coached student teams for regional and national robotics competitions, achieving consistent high placements.
- Maintained transparent parent communications on student progress, strengthening programme trust and retention.

- DELF A1 (French, Distinction)
- DELF A2 (French, Distinction)
- Diploma in IT (Distinction)
- Cisco IoT and Digital Transformation
- Linux Foundation LFEL1012: Secure AI/ML Software Development

ACHIEVEMENTS

- Google KitaHack 2025 Participant
- Multiple Futsal Tournament Champion
- District-Level Track and Field (Shot Put)
- Top Scorer DELF A1/A2 French Exams
- National Physics and Chemistry Quiz Rep
- House Captain and Class Monitor

TECHNICAL PROJECTS

Punca-AI | Python, Gemini API, Streamlit | Google KitaHack 2025

- Built an AI-powered math education app where students snap or upload a worksheet to receive a structured remediation plan identifying chapters to revisit and step-by-step problem guidance.
- Developed a teacher analytics dashboard delivering per-student strength and weakness insights, enabling personalised instruction at scale with an equal-education-for-all mission.

Outcome: Presented at Google KitaHack 2025; demonstrates real-world AI addressing educational inequality in Malaysia.

Dina and Dyno (Multi-Persona AI Chatbot) | Python, Ollama, ChromaDB, RAG, Streamlit

- Built a privacy-first local AI chatbot with multiple personas, persistent ChromaDB memory, RAG-powered contextual responses, real-time streaming, and a fully offline-first architecture.

Outcome: Scalable, privacy-preserving AI system demonstrating applied LLM, RAG pipeline design, and production system architecture.

Travelicks (Full-Stack Homestay Platform) | Laravel, Vue.js, Google Maps API, MySQL

- Developed a culturally tailored homestay booking platform with halal-friendly filters, community ratings, Google Maps integration, and a full admin analytics dashboard tracking booking trends.

Outcome: Production-ready full-stack web application with analytics-backed UX and complete booking lifecycle management.

Smart Irrigation System | Arduino Uno, ESP8266, Blynk, IoT

- Built a hybrid IoT irrigation system with threshold-based pump automation, fail-safe offline operation, TLS-encrypted remote monitoring via Blynk, and local I2C LCD diagnostics.

Outcome: Resilient, autonomous irrigation system with zero-downtime architecture and secure encrypted remote access.

Computer Vision Pipeline | Python, OpenCV, NumPy

- Developed document segmentation (projection profile OCR) and video anonymisation (Haar Cascade with Gaussian blurring) pipelines with HSV-based low-light video enhancement.

Outcome: Accurate, privacy-preserving document and video processing pipeline deployable in production environments.

NutriTrack (Desktop Nutrition Tracker) | Scala 3, ScalaFX, SQLite, MVC

- Built a full MVC desktop application with FXML UI, DAO-pattern SQLite persistence, BMI/TDEE calculators, and trend visualisation charts demonstrating strong OOP design.

Outcome: Data-centric desktop application showcasing functional programming and object-oriented principles in Scala.

EXTRA-CURRICULAR AND ACHIEVEMENTS

- Google KitaHack 2025: Competed in Google Malaysia's premier hackathon, building Punca-AI to tackle educational inequality through accessible AI-powered math tutoring.
- IMeche Committee (Publicity and Marketing): Spearheaded digital content and marketing campaigns promoting engineering events at Sunway University.
- Hackathon: Deployed Gemma 3 locally via Ollama, focusing on offline LLM execution, performance benchmarking, and optimisation.
- Sports: Multiple futsal tournament champion; District-level Track and Field (Shot Put) competitor; school Volleyball representative.
- Community: Fundraising chess events supporting charitable causes; served as House Captain and Class Monitor at SMK USJ 12.
